

High Concept:

"Alien Survival FPS in space"

While military are protected the world from a civil war on earth, space soldiers are protecting the orbit of earth. Aliens are attempting to take over the Earth for resources and the space soldiers are the only ones who can defend it.

The game is based in space, the equipment, weapons and armour are all high-tech and futuristic. Some features of the game mechanics will include jetpack, laser rifles, anti-gravity, and super-weapons.

The main point in the game is to survive the alien waves with 3 other friends. There are a variety of aliens with different attributes that will be harder to kill as the rounds go by. There are pickups and supplies to use while your surviving, so use them to your best ability.

The theme of the game will be in space. The maps and environments will swim around areas such as a galactic battle ship, a moon crater and a floating junkyard.
